Rear Axle location Kits

Club Evolution Kit

Study the rear of the single leaf spring Capri and you will notice the absence of any kind of lateral location strut. This causes the bodywork to move out sideways in relation to the axle/wheel when cornering. The faster or tighter the bend the more disconcerting! Brace the axle to the leaf spring using the brackets and radius arms mounted at 45° to virtually eliminate all the sway from the axle.

Another Capri problem is torque tramp, the evolution axle location kit reduces this tendency resulting in improved traction. Plated finish for appearance and protection. Suitable for single leaf cars only
H015 Club Evolution Kit £95.00

Club Handling Kit

Anti Tramp Brackets. Unique bracket that helps stop rear leaf springs twisting on acceleration and deceleration. No welding required simply bolts on then clamps to forward part of leaf springs. Suits single and multi leaf applications
H026 Club Handling Kit £60.00

Strut Brace

Heavy Duty Adjustable Engine bay strut brace - plated finish for appearance and protection. Brace with adjustable tensioning bracket, easy to fit, gives effective bracing between the struts. Made from tubular steel for extra strength
H016 Pinto Strut Brace £89.00
H018 2.8 Strut Brace £89.00
H017 3.0 Strut Brace * please note the power steering reservoir must be moved on the Mk II/Mk III 3.0 models to fit this brace £75.00

SECOND HAND STOCK

It would be virtually impossible to price and list the clubs range of second hand stock because we can supply virtually any component. Obviously condition varies depending on age and mileage. However many of the Capris we have collected will be tested to ensure good mechanical condition.

Every week the stock situation can change and we never know what's going to turn up next as we are offered anything from basic models up to injection specials. Occasionally we take on part completed restoration projects and new old stock. These are advertised regularly in the Club Magazine...

Improve And Modify : Capri

Lindsay Porter & Dave Pollard

The Capri brought stylish, coupé motoring within reach of the general public, and four years on from its 1968 debut, a million examples had been sold. Capris remained in production for 19 years, and the continuing availability of spare parts and accessories ensures that the Capri will have an enthusiastic following for many years to come. Here is a complete guide to the processes needed to improve and modify a Capri, illustrated with more than 800 step-by-step photographs and drawings. This book was first published in 1992 and has now been re-issued as a digitally printed paperback.
